

Palisades-Kepler State Park September 13, 2014  
Foray with Naturalist Adventures and Prairie States Mushroom Club

Agaricus sp.  
Aleurodiscus oakesii = Hophornbeam Disc or Oak Bark Eater  
Amanita vaginata = Gray Grisette  
Armillaria sp. = Honey Mushroom  
Artomyces pyxidatus = Clavicornia pyxidata; Crown Coral  
Auricularia auricular = Tree Ears; a jelly fungus  
Bisporella citrina = Yellow Fairy Cups  
Boletus spp. = fleshy mushrooms with tubes instead of gills  
Bondarzewia berkeleyi = Berkeley's Polypore  
Calocera cornea = Yellow Tuning Fork  
Cantharellus cibarius = Yellow Chanterelle  
Crepidotus spp. = like little Oysters but with brown spores  
Crucibulum leae = Kettledrum Bird's Nest Fungus  
Dacryopinax spathularia = Yellow Jelly Fan  
Daldinia concentrica = Carbon Balls or Cramp Balls with concentric interior zones  
Discomycetes = several representatives of the group of ascomycete cup fungi  
Ductifera pululahuana = Exidia alba; white jelly fungus  
Entoloma abortivum = Cottage Cheese Mushroom parasitizing Honey Mushroom  
Ganoderma applanatum = Artist's Conk  
Gliophorus psittacinus = Hygrophorus psittacinus; Parrot Mushroom  
Gyroporus castaneus = Chestnut Bolete  
Helvella elastic = Elfin Saddle with smooth stipe  
Hymenoscyphus fructigenus = Stalked Nut Cup  
Hypomyces chrysospermus = Bolete Mold  
Inocybe sp. = Fiber Head  
Ischnoderma resinosum = Thin Skin Resin Polypore  
Laccaria amethystina  
Laccaria laccata  
Laccaria ochropurpurea (purple gills)  
Lactarius hygrophoroides (mild white latex not staining brown like L. volemus)  
Lactarius subplinthogalus (distant gills; acrid white latex staining salmon)  
Laetiporus sulphureus = Chicken-of-the-Woods or Sulphur Shelf  
Leotia lubrica = Yellow Jelly Babies  
Lepiota sp.  
Lycoperdon cf. curtisii = small puffball with connivent spines  
Lycoperdon perlatum = Gem-studded Puffball  
Marasmius rotula (wire stem and gills attached to collar at apex of stipe)

*Marasmius siccus* = Pinwheel *Marasmius*  
*Mycena haematopus* = Bleeding *Mycena*  
*Mycena leaiana* = Lady Lion; emarginate gills with orange edge  
*Mycena luteopallens* = Yellow Hickory Nut *Mycena*  
*Mycena* spp.  
*Omphalotus olearius* (= *Clitocybe illudens*; Jack-O-Lantern glows in the dark)  
*Panellus stipticus* (= *Panus stipticus*; glows in the dark)  
*Phaeocalicium polyporaenum* = Fairy Pins; tiny black columns on Purple Tooth  
*Phellinus gilvus* = Tiger Eye Polypore  
*Phlebia incarnata* = *Merulius incarnates*; wrinkled undersurface  
*Pleurotus ostreatus* = Oyster Mushroom  
*Pluteus cervinus* = Deer Mushroom  
*Polyporus varius* = pileus with radial fibers; *P. elegans* is smooth  
*Psathyrella* cf. *echiniceps* = Weeping Widow; mottled black gills  
*Ramaria* cf. *aurea*  
*Ramaria stricta* = coral mushroom on wood; branches with pointed tips  
*Russula mariae* = purple pileus; not *R. mairei* of the *R. emetica* group  
*Russula virescens* = Mossy Green *Russula*  
*Russula* spp.  
*Sarcoscypha occidentalis* = Stalked Red Cups  
*Scelroderma cepa* = Smooth Earthball  
*Scleroderma citrinum* = *Scleroderma aurantium/vulgare*; Scaly Earthball  
*Schizophyllum commune* = Split Gill  
*Spinellus fusiger* = *Mycena* Mold (zygomycete parasite on Bleeding *Mycena*)  
*Stereum complicatum* = Orange Log Leaves  
*Stereum ostrea* = False Turkey Tail or Log Leaves  
*Strobilomyces floccopus* = Old Man of the Woods Bolete  
*Trametes elegans* = *Daedaleopsis ambigua*; Ambiguous Polypore  
*Trametes versicolor* = Turkey Tail used in traditional oriental medicine  
*Tremella fuciformis* = translucent jelly fungus  
*Tremellodendrum pallidum* = False Coral Jelly  
*Trichaptum biforme* = Purple Tooth  
*Tricholomopsis platyphylla* = Spring Mop or Platterfull Mushroom  
*Tyromyces* sp. = spongy white polypore  
*Xeromphalina kauffmanii* = Kauffman's Little Mushroom  
*Xerula megalospora* = *Oudemansiella radicata* with smooth stipe  
*Xylaria* sp. = Dead Man's Fingers
