

Wildcat Den State Park 9-9-2017 PSMC Foray

In attendance: sisters Ari and Annabelle, their mom Channing, David and Katelynn, Mike K, Marty, Dave and Sally, Damian, Michael, Patti, Roger, Glen, Dean

Aleurodiscus oakesii – Oak Parchment or Smooth Patch Disease
Armillaria sp. – Honey Mushrooms
Bisporella citrina – Yellow Fairy Cups
Boletus fraternus grp. – Bolete with red cap and yellow tubes, staining blue
Coprinellus radians – Inky Cap that fruits amid orange fuzzy carpet called an “ozonium”
Crepidotus sp. – Little brown-spored oyster-like mushrooms
Daldinia concentrica – Cramp Balls or King Alfred’s Cake
Flammulina velutipes – Velvet Foot
Fuscocerrena portoricensis – Green Tooth [Glen collected this resupinate effused-reflexed polypore with greenish-yellow pore surface with ragged dissepiments as in Purple Tooth; tentative ID by Dean]
Ganoderma applanatum – Artist’s Conk
Hypomyces chrysospermus – Bolete Mold
Irpex lacteus – Milk Tooth
Laetiporus sulphureus – Chicken-of-the-Woods or Sulphur Shelf
Lycoperdon perlatum – Gem-studded Puffball grows on ground
Lycoperdon pyriforme – Pear-shaped Puffball grows on wood
Meripilus sumstinei – Hen-of-the-Woods look-alike, edges stain black
Mycena leaiana – Lady Lion
Mycena luteopallens – Nut Mycena
Mycena spp.
Phaeocalicium polyporaenum – Fairy Pins parasite on Purple Tooth
Phlebia incarnata – Coral Pink Merulius
Phleogena faginea – Balls-on-Stick Jelly Fungus [Roger collected this specimen which looks like a large slime mold but is really a jelly fungus; it has septate basidia and clamp connections]
Phellinus gilvus – Tiger Eye Polypore
Pleurotus citrinopileatus – Golden Oyster Mushroom
Pleurotus levis – Looks the same as *Pleurotus dryinus*
Pluteus cervinus – Deer Mushroom
Polyporus badius – Canvas Polypore or Bay-colored Polypore
Polyporus elegans – Black Foot Polypore with striate cap The literature is mixed on whether
Polyporus varius – Black Foot Polypore with smooth cap these 2 are the same or not.
Polyporus squamosus – Pheasant Back or Dryad’s Saddle
Psathyrella velutina – Weeping Widow; new name is *Lacrymaria velutina*
Rhodotus palmatus – Net Cap
Russula spp. – Brittle Caps
Schizophyllum commune – Split Gill
Scutellinia scutellata – Eyelash Cup
Stereum complicatum – Orange Parchment
Stereum ostrea – Common Parchment
Trametes conchifer – Bird’s Nest Polypore
Tyromyces chioneus – White Cheese Polypore
Trichaptum bifforme – Purple Tooth
Xerula megalospora – Rooting Collybia; new name is *Hymenopellis megalospora*
Xylaria hypoxylon – Deer Antlers or Dead Man’s Fingers [Dean verified Glen’s ID of this fungus; the spores were fusiform, less than 16um long, and with a germ slit nearly end to end]
Xylobolus frustulatus – Cracked Mud Parchment
